New Role For Old Favorite

5. Bag Boy's Hybrid HCX is another interesting golf/travel bag design. A crush-proof, wrap-around, clamshell top makes packing clubs and traveling with them a snap. The shell lines up with molded side connectors to position it around the clubs. Four Velcro straps help to secure the shell, bag and clubs during travel. The bag features a 9-inch, five-way divider top with full-length dividers and four removable side pockets that provide plenty of storage for garments, shoes and accessories. Durable in-line skate wheels, padded and conveniently located comfort grips, a keyed lock and a removable shoulder strap round out the functional design. 1-800-955-2269, www.bagboycompany.com

6. Players who prefer walking the course can carry their sticks in a stand bag that's as technologically advanced in looks and performance as the clubs carried in it. **Nickent's Stable Loc Stand Bag** features lightweight, reflective, polyester/nylon materials with four-way, full-length shaft dividers and a double-strap carry system for effortless transport. The Stable Loc System ensures ease of use and a secure foundation no matter the terrain. A seven-pocket configuration provides plenty of storage with separate, easy-access cell-phone and water-bottle pouches. 1-888-NICKENT www.nickentgolf.com

7. FootJoy StaSof golf gloves are reinforced by Taction APL Cabretta leather, which is exceptional in moisture resistance and the long-lasting soft feel that has come to exemplify FootJoy's golf gloves. A Coolmax Lycra insert sits across the knuckles for a smooth and comfortable fit as the hand flexes, while the angled ComforTab closure provides for a precision fit. 1-800-224-8501, www.footjoy.com
