

Bag Boy Introduces the PC-90 Three Wheel Cart --Third Wheel Adds Stability Allowing Cart To Be Pushed AND Pulled--

RICHMOND –The Bag Boy Company recently introduced the latest addition to their state-of-the-art line of pull carts, golf bags, and accessories. The PC-90 Three Wheel Push Cart is designed so that it can be both pushed and pulled by golfers depending on the terrain.

“The trend among today’s golfers is to push the cart around the course—The PC-90 gives golfers this flexibility,” said Leighton Klevana, Vice President of Bag Boy. “This Three Wheel Push Cart is designed to make transporting clubs as easy as possible so people can concentrate on their game.”

The PC-90 Three Wheel Push Cart features a third wheel and unique adjustable handle to ensure stability and comfort, whether this revolutionary cart is pushed or pulled. The extra wide handle and 11½ inch wheels with steel bearings increase the ability to maneuver this pull cart effortlessly on or off the golf course. With the exceptional quick release folding mechanism the size of the PC-90 is reduced by half and the third wheel pivots back for even more compactability. This premium pull cart is also equipped with a convenient push-on and push-off brake design to prevent cart from rolling. Extra features such as the beverage holder and exclusive scorecard holder with interior storage compartment make this cart even more convenient for avid golfers. Like all Bag Boy products, the PC-90 is constructed of premium materials including a heavy-duty bag bracket and high modulus ultra lightweight aluminum tubing.

The Bag Boy Company was founded in 1946 and is recognized as an industry leader in the pull cart, golf bag and accessory markets by providing outstanding customer service and dependable products for over 55 years.
