

## **Bag Boy Introduces Complete Line of Three Wheel Push Carts --The Best Way to Walk the Course --**

RICHMOND –The Bag Boy Company recently introduced four new three wheel push carts; two new Express carts, the SE and the GX; along with two 500 Series carts, the SC and the Jr.

Ergonomically designed, three wheel push carts allow you to effortlessly push your clubs around the course in stride. Utilizing the natural positions of your arms, push carts reduce muscle strain and promote proper walking posture. Due to the third wheel design, three wheel carts track straight, minimizing the wasted side to side motion of 2-wheel pull carts.

“The trend among today’s golfer is to walk rather than ride and a three wheel push cart is the easiest way to walk your clubs around the course,” said David Boardman, President of Bag Boy. “I honestly believe that the people who try one of our new three wheel push carts will never carry their clubs again.”

To illustrate the popularity of three wheel push carts, the number of high end (over \$100) three wheel push carts sold has surpassed the number of entry level (\$39-\$49) pull carts sold in the U.S. market. Just five years ago, pull carts could only be found at municipal or daily fee golf courses. However, new three wheel push carts are used at all types of courses, including high-end daily fee, exclusive country clubs and prestigious resort courses.

“The number of golf courses carrying a Bag Boy cart has increased by over 2,500 accounts in the just the past three years,” stated Boardman. “We expect that trend to continue as more and more golfers and golf courses realize the benefits of walking the course with a push cart.”

The Bag Boy line of Three Wheel Push Carts include the state of the art Express SE, Express GX, SC-500 and Jr. 500. These carts feature large diameter wheels for a better roll and reduced drag allowing the carts to coast with a simple push. Other key features include removable wheels, which reduces assembly to simply inserting the three wheels into their housing units and locking them in place with a pressure clamp. No tools needed! In addition, the removable wheels allow for a much more compact fold and reduce the overall weight of the cart, making it easier to handle. Plus, there are no tools needed to assemble these carts!

The Bag Boy Company was founded in 1946 and is recognized as an industry leader in the cart, travel cover and golf bag markets by providing outstanding customer service and dependable products for over 58 years.
